By Edmund Wehrenfennig

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****. Excerpt from The Analysis and Softening of Boiler-Water This work undertaken with the collaboration of a chemist is made necessary in consequence of numerous subsequent inquiries regarding the essay appearing in the Journal for the Advancement of Railway Interests (Organ fur die Fortschritte des Eisenbahnwesens) of the year 1893 On the Examination and Softening of Boiler Feed-water (Ueber die Untersuchung und das Weichmachen des Kesselspeisewassers). In the above new work it was sought to show the chemical procedure on which water purification is based, and exhibit a short and simple water analysis, and method of calculating the quantities of reagents required for water softening to be used in practice. In it the information most vitally needed for practical water analysis and purification is reiterated and the other results of my previous essay are presented for use. Besides this, the report on feed-water was written opportunely by the author for the commission of Austrian Railway Managers at the Railway Exposition (Paris, 1900), and as a result it was followed by the Report of the Technical Committee of the Society...

Reviews

Very helpful to all of group of men and women. It can be written in easy terms instead of confusing. You will like how the writer write this book.

-- Dr. Daren Mitchell PhD

Thorough guideline! Its this type of good read. It is really simplistic but shocks from the 50 percent from the publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
