

## A system of popular Geometry containing in a few lessons so much of the elements of Euclid as is necessary and sufficient for a right understanding . in its leading truths and general

By George Darley

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1836 Excerpt: ... Ea, Ed, Eb. Then in the triangles Edb, Eda, Eb would be equal to Ea, since E is the centre; Db is given equal to Da; and Ed is a common side. Therefore, by Art. 6, the angle Edb would be equal to Eda, and consequently each would be a right angle by Def. VI. But Cdb is a right angle, because cd is a perpendicular. Consequently, on the above supposition, the angle Edb would be equal to the angle Cdb, by Art. 8, --the whole to a part, which is impossible. --Hence, the above supposition is false; that is, the centre does not lie out of the perpendicular Dc, but in it. This, and c. Pros. XI. To find the centre af a given circle. Let Abc be a circle. It is required to find the centre of it. Construction. Draw any chord Ac inthe...
